

Electric Detonator

▶ Electric Detonator

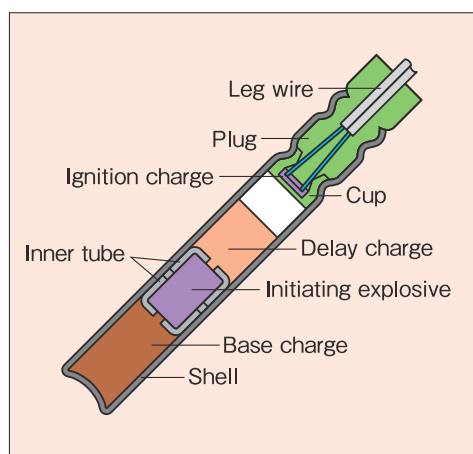

Instantaneous electric detonator

An instantaneous electric detonator is a type of electric detonator that explodes instantaneously when electricity is turned on.

Delay electric detonator

A delay electric detonator is a type of electric detonator that has a time lag in seconds before detonation.

DS delay electric detonator

DS delay electric detonator is set to an interval of several deciseconds. The delay number is indicated on the white bundle tape.

MS delay electric detonator

MS delay electric detonator is set to an interval of several tens of milliseconds. The delay number is indicated on the orange bundle tape.

Package table

Type	Leg wire length (m)	Standard resistance(Ω)	Quantity (pcs)	Gross weight (kg)	Carton size D×W×H (mm)
Electric Detonator	3.0	1.47	500	11	335×560×125
	4.5	1.86	500	15	335×560×140
	6.0	2.24	250	10	335×560×125
	7.5	2.63	500	22	335×560×205
	9.0	3.00	400	21	335×560×205

Leg wire colors and standard delay time for DS / MS delay electric detonators

Delay interval	Leg wire color		Standard delay time		Delay interval	Leg wire color		Standard delay time	
			DS(sec)	MS(ms)				DS(sec)	MS(ms)
1st		White / White	0	0	11th		Red / Orange	2.70	350
2nd		Red / White	0.25	25	12th		Red / Black	3.10	400
3rd		Green / White	0.50	50	13th		Green / Orange	3.50	450
4th		Orange / White	0.75	75	14th		Green / Black	4.00	510
5th		Black / White	1.00	100	15th		Orange / Black	4.50	570
6th		Red / Red	1.25	130	16th		White / Brown	5.10	640
7th		Green / Green	1.50	160	17th		Red / Brown	5.70	710
8th		Orange / Orange	1.75	200	18th		Green / Brown	6.30	800
9th		Blue / Orange	2.00	250	19th		Orange / Brown	6.90	890
10th		Red / Green	2.30	300	20th		Black / Brown	7.50	980
